Dear Sara,

A while ago, you asked me about types of wrongdoing by Tetra Tech EC Inc. Would this information be useful to you? I have attached some files that relate to the following:

- 1- Plea agreements from enforcement action against 2 individuals re their criminal actions
- 2- Spreadsheet with brief descriptions of allegations of falsification, failure to follow workplan, etc.
- 3- NRC enforcement action re swapping samples – See attachment near the end of the ltr for description of violations. Tetra Tech EC Inc. acknowledged these violations occurred in other documents I can give you. In Oct 2016, NRC concluded this enforcement action.
- 4- NRC petition with declarations from 7 former workers – highlighted overview document. This is the main basis for the spreadsheet with catalogue of the allegations sorted in categories
- 5- EPA analysis of data and types of potential signs of falsification. Some overlap with allegations; some do not.

In other documents from the Navy, which I haven't included, the Navy has found that in the radiation screening yards, in up to 75% of survey units it appeared that biased soil samples were collected in locations that purposely avoided the highest gamma scan results.

Here is a link to the press release from DoJ:

<https://www.justice.gov/usao-ndca/pr/radiation-control-technician-supervisors-sentenced-falsifying-former-hunter-s-point>

Please let me know any more information you may need.
